Microsoft Access for Crime Analysis - Introduction

MS Access for Crime Analysis—Intro

This in-person hands-on course provides students with an introduction to using Microsoft Access for Crime Analysis, a program most analysts already have but underutilize. Students will learn how to use Microsoft Access to create and import tables, query and filter data within tables, make tables new tables, append to existing tables, combine data from different datasets, and create useful reports. Students who complete this course are able to link and import crime and offender data into Access, query and filter the data to find patterns in crime, and produce meaningful reports.

Level: Beginner

Cost: $450

Length of Course: 3 days (21 total hours)

Dates	Times	Location	City	State
May 13-15, 2025	8am to 4pm	5801 E. Slauson Ave	Commerce	California
