Excel for Crime Analysis — Intermediate

Extend your Excel skills with our intermediate Excel course for Crime analysis. Clean data faster and easier with our tips and tricks. Validate your data with rules to eliminate dirty data. Optimize your analysis by using lookups and advanced formulas. Learn how to create a dashboard within Excel, forecast trends with our advanced statistical model, use macros to automate tasks, and find patterns with conditional formatting. We also cover advanced charting for insights into your data, shortcuts to make your tasks faster, and ways to obtain quick statistics. We show you how to quickly and efficiently analyze data so you can respond to requests for crime statistics, call for service response times, and other department requests that may come your way. This course is packed with great information to help you streamline your workflows, optimize your efficiency, and minimize the time spent cleaning data and finding patterns. It's time to level up your spreadsheet skills!
